**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a plasma source, classified in class 118, subclass 723R.
- II. Claims 14-25, drawn to an apparatus, classified in class 156, subclass 345.48.
- III. Claims 26-40, drawn to a method, classified in class 29, subclass 25.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the apparatus does not require a plasma source with a coil support means and/or a plasma source that the helical coil be provided between the outer shield and the dielectric chamber wall. The subcombination has separate utility such as in an apparatus that do not use a chuck assembly or in an apparatus in which the gas injection system is provided in another position other than opposite to the chuck assembly.

Inventions III and I, and III and II, are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as

claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as an etching, depositing or cleaning a substrate process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for one Group is not required for the other Groups, restriction for examination purposes as indicated is proper.

A telephone call was made to Edwin Garlepp on 6/2/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Luz L. Alejandro whose telephone number is 571-272-1430. The examiner can normally be reached on Monday to Thursday from 7:30 to 6:00.
